Ecoflame, from M.A.C. Metalcraft.

This wonderful new range of KIWA approved woodburning and multi-fuel stoves has been manufactured specifically to comply with 2022's latest UK legislation that requires all new stoves to meet strict criteria around air quality, meaning that each purchase from Ecoflame stoves practically futureproofs your customers and adds to their comfort.

When climate change is a key factor in your customers' minds when making their purchases, and energy costs are driving more people to using classic fuel burners and stoves, it makes sense to stock and sell stoves that are ecologically friendly, with A+ energy ratings, guaranteed to provide lower running costs than gas-heating systems.

Call 01709570563 to chat with our team about taking on stock of any of our fantastic range of seven ecologically friendly stoves, each made of robust steel, with cast iron doors and stunning glass windows, all approved for use in Smokeless Zones.

Multifuel Stove

Ecoflame 1

Multifuel

This innovative heating solution was designed and built to meet the latest UK standards, and is approved for smokeless zones, to allow responsible and climate-friendly burning within smoke control areas.

With an A+ Energy Rating, the Ecoflame 1 multi-fuel stove is a remarkable alternative to expensive gas heating for your customers' homes, providing unrivalled value for money and energy efficiency.

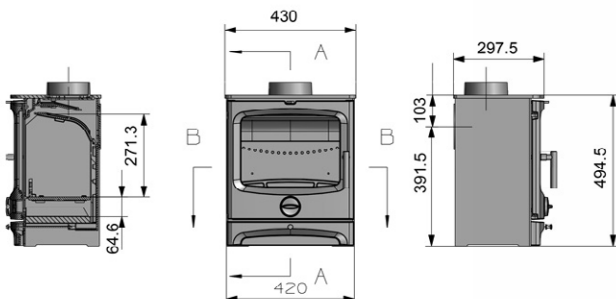

Each 65kg stove features a strong steel body, cast iron door, and a large glass panel with air wash function to keep the doorway clear of smokey deposits and enhance the visual experience. Multiple airflow settings enable control of the burn, with smoke safely ejected through the 125mm flue.

Dimensions:

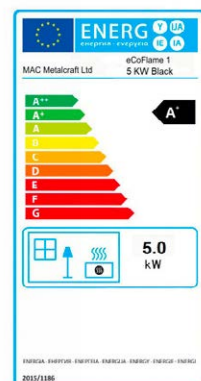

494.5mm High

430mm Wide

297.5mm Depth
